Cool, clean and fresh are some of the best words describing this range of uniquely designed bed combinations from Stompa. Treated with a beautiful white lacquered finish giving you the opportunity to dress this range as bold and wacky as you like - Your kids will love it!

## Uno Mid Sleeper

Kids cannot wait to reach the age where they are big enough to sleep in a mid sleeper.

It is a great space saving bed offering masses of functional room under the bed when space is tight, or when you just simply want a bit more than just a bed.

Mix and match between storage units and desk—but remember to leave a little space for a “secret” den!

Recommended min. age for mid sleeper is 3 yrs

Nice, flat steps on ladder, comfy for feet

Ladder and desk can be fitted either side

The pull out desk is on castors and pushes under the bed easily.

## Uno Cabin Bed

A sleek storage bed with two roomy cupboards, two shelves and additional storage/display area at either end for all that necessary "stuff" that teenagers need.

This is also a great bed for the spare bedroom or study dressed with lots of colourful cushions and used as a trendy sofa

Add another under bed storage unit at the other side and have the bed free standing for even more amazing storage space!

Stack 2 cube units on top of each other for double storage in the same space. Arrange the doors however you like.

# Stompa®

## More than just a bed

### It all started back in the 60's

The Stompa trademark was established at the beginning of the 1960s.

Since then Stompa has become one of the leading children's furniture brands in the UK and across Scandinavia.

The business concept was then—and still is—to design and manufacture good quality, functional kid's bedroom solutions offering **more than just a bed**.

Stompa furniture has been designed to grow with your children from their first bed through their teenage years and beyond.

We source all raw material from sustainable and managed forests and pride ourselves in our attention to safety details. All our products are manufactured and tested according to the latest British Standard Safety Regulations.

Stompa operates a system of continual development and improvement and reserve the right to alter specifications should circumstances change. This brochure is supplied as a guide only. The dimensions given are approximate only. The reproduction of colours is as accurate as photography and printing processes allow. Please check with your stockist for product availability.

[www.stompa.com](http://www.stompa.com)

### Caring for your furniture:

1: The Uno range has been produced from a mixture of MDF and pine sourced from managed forests. We have used environmental friendly lacquers.

2: Cleaning should be done using a dry or slightly damp cloth.

3: To comply with UK flammability regulations FR treatment has been applied to cover fabrics where necessary. The FR treatment will not be effective if the fabrics are washed. Please consult a specialist cleaner for more general cleaning requirements.

4: Zips, where fitted are to aid manufacture and do not necessarily mean the cover is removable.

5: Sprung mattresses should be turned weekly for the first month or two and monthly thereafter. With foam mattresses, some dipping may occur after use, this is perfectly normal and caused by settlement.

### Avoiding damage:

1: Wipe up spills immediately,

2: Avoid placing hot drinks directly on the surface.

3: Avoid placing furniture near radiators or other heat sources. Constant and intermittent heating can change the moisture content of the timber resulting in cracks and distortions.

4: Do not overload drawers which can put strain on drawer base and runners.

5: Do not allow children to jump on the slats or from the top bunk.
